What I do: I am a PostDoc working on the data processing of the Gaia satellite

A woman that inspires me: so many! All those working at the IoA, from the Professor to the PhD student, because it is great to see the support we give to each other.
When I was a kid, Margherita Hack
“Eva’s only fault has been the one of wanting to know more, to experiment and search with her own sources the laws of the Universe, of her own body and to refuse the teaching from ‘above’”.
...and even a fictional woman, Jo March.
“Women, they have minds, and they have souls, as well as just hearts. And they’ve got ambition, and they’ve got talent, as well as just beauty. I’m so sick of people saying that love is all a woman is fit for.”

Advice I would give to my younger self:
Dare more, overthink less, and don’t care (too much) about other people opinions.
